

# Garry Bevan *Curriculum Vitae*

## Personal Information

**Nationality:** British

**Marital status:** Single

**Address:** Jalan Kutat Lestari, Gang 8 #4A, Sanur, Bali, Indonesia

## Education

Rochester Grammar School, Kent, England

Maidstone College of Art, Kent, England

London College of Print and Design, London, England

## Working, Diving and Exploring Indonesia

Arriving in Bali, Indonesia in June 1995 I started a contract managing a brand new dive centre and resort on the north coast of the island. After three years I decided to move on and work for a shortwhile with the Dive & Dive's centre in Sanur, also in Bali before taking short term positions in Guam and Palau.

Returning to Bali in 2000 I was recommended to manage the then brand new Peter Hughes Diving Komodo Dancer liveboard vessel and up to this day still have a very happy working relationship with the company that launched both that boat and the Dewi Nusantara, Indonesia's premium dive liveboard.

Although I have extensive cruising and diving experience in the seas all around the Indonesian archipelago, the regions that I have operated in the most are the Komodo National Park, the conservation area of Raja Ampat and the eastern section of Nusa Tenggara, the islands between and including Flores and Alor. During the past 12 years I have made over 300 cruises to these fascinating areas and, with a little exploration, find that every visit comes up with new and exciting experiences different from the last, both on land and underwater.

## Media Production

Examples of a wide range of filmed, photographed, written and designed movies as well as a selection of printed/digital presentation materials focused on diving and exploration in Indonesia are all viewable online or available on request. I have also worked on TV projects, most notably as underwater cameraman for the German TV production "Traumschiff" and more recently as marine camera assistant to Howard Hall for a National Geographic production called "Giants of the Deep".

## Employment Record
